modes of action

Smooths skin texture and calms irritated skin.

Composition

Native collagen fibers form a three-dimensional network. The highly concentrated native collagen has a high waterbinding capacity, ensuring a continuous supply of the active ingredients and an intensive moisture transfer to the skin. **Native collagen peptides** are recognized in the skin, act as signal for collagen stimulation and promote skin regeneration and repair. **Native collagen molecules** strengthen the skin's moisturebinding capacity, support the smoothening of wrinkles and balance the skin's surface for a healthy protection. Glycolic Acid, Citric Acid, Lactic Acid, Camellia Sinensis Leaf Extract. Alpha-Hydroxy Acids are natural acids from e.g. grapes, apples, olives, lemons and milk and the skin-smoothing effect has been known for centuries. They gently detach dead skin cells and stimulate the formation of new skin cells. Furthermore the polyphenols in green tea possess potent antioxidant properties, binding free radicals.

Inci

· Collagen · Hydrogenated Polyisobutene · PPG-15 Stearyl Ether · Glycolic Acid · Citric Acid · Lactic Acid
· PEG-40 Sorbitan Peroleate · Hydrolyzed Elastin · Camellia Sinensis Leaf Extract · Desamido Collagen
· BHT · CI 77289 (Chromium Hydroxide Green)

Scientific Data

+59% Increase in skin moisture (Corneometry, activated with Activation Liquid 17SF)¹
-38% Decrease in skin roughness (PRIMOS, activated with Activation Liquid 17SF)¹
-27% Reduction of redness (Chromometry, activated with water)²

Dermatologically tested

Color

Green

Shelf Life

3 years in original, unopened packaging

Storage

Room temperature. Protect from dampness and direct sunlight exposure
