## Composition

**Native collagen fibers** form a three-dimensional network. The highly concentrated native collagen has a high waterbinding capacity, ensuring a continuous supply of the active ingredients and an intensive moisture transfer to the skin. **Native collagen peptides** are recognized in the skin, act as signal for collagen stimulation and promote skin regeneration and repair. **Native collagen molecules** strengthen the skin's moisturebinding capacity, support the smoothening of wrinkles and balance the skin's surface for a healthy protection. **Caviar Extract.** Caviar is rich in natural proteins, minerals, essential amino acids and various vitamins. The balanced mix of important minerals, such as magnesium, potassium or iron, ideally nourishes skin. The high level of glucosides also reduces water loss and combats skin's dehydration.
