Please scan for detailed
product information such
as application videos or
modes of action

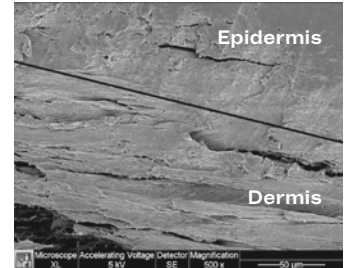

Detoxifies, purifies and refines the skin.

Before/After

Irritated and rough skin before treatment with Natural Algae Massage Gel¹

Smoothed and calmed skin after treatment with Natural Algae Massage Gel¹

Composition

- The Natural Massage Gel comes in the format of lyophilized pads made of brown algae extract (calcium alginate) that upon activation with water or our Activating Liquid 17SF turns into a lubricant Massage Gel. You can either activate it in a bowl or directly on the skin.
- The gel detoxes and refines the skin through binding corneocytes and bacteria during application, the gel is rinsed off at the end of the treatment and so it removes toxins and dead cells from the skin.
- A **low pH level** supports the skin's barrier function and helps to maintain a healthy skin microbiome.
- The massage gel is free from preservatives, fragrances, mineral oils, silicones & colorants. It is **vegan & ocean friendly**. Our product is biodegradable and cosmetic grade certified.
- This extraclean formulation does not need **PEG/PPG/BHT** but contains **Mannitol** to protect against blue light as well as **Triglyceride Oil** to help preventing oily skin and is suited for acne prone skin.

Inci

· Algin · Cellulose Gum · Tricaprylin · Caprylic/Capric Triglyceride · Rayon · Mannitol · Calcium Alginate
